

# track record of success

The Foundry® is the premier medical device company incubator for inventors to rapidly transform their concepts into companies. The Foundry's highly experienced team of senior technical and business executives has founded and financed ten medical device companies since its inception in 1998. These new medical device businesses have generated over \$1.0 billion of value for their founders and investors and employ more than 350 people today, further establishing a proven track record of success.

## **Evalve, Inc.**

Founded in 1999, Evalve designs, develops, manufactures and markets innovative devices to enable percutaneous repair of cardiac valves.
